EDUCATION

Johns Hopkins University

Baltimore, MD | Expected May 2027

B.S. in Computer Science; second major in Cognitive Science / Dean's List (5 semesters)

- **Coursework:** Machine Learning; Deep Learning; Algorithms; Data Structures; Linear Algebra; Human-Computer Interaction; Computational Cognitive Neuroscience of Vision
- **Fall 2026:** Artificial Intelligence; NLP: Self-Supervised Models; Reinforcement Learning
- 2023–2025 leave for mandatory Republic of Korea military service; completed AI and full-stack training (below)

TECHNICAL SKILLS

- **Languages:** Python, TypeScript/JavaScript, Java, SQL; coursework in C/C++
- **AI / ML:** PyTorch, YOLO object detection, LLM integration & prompt engineering, retrieval-augmented generation (graph RAG with Neo4j), GPU-based model training, EEG & intracranial neural data preprocessing and analysis
- **Web & Tools:** React, NestJS, Node.js/Express, Flask, Prisma, Redis, REST APIs, Playwright, Git/GitHub, npm/Turborepo

EXPERIENCE

Software Engineering Intern — Manyfast (manyfast.io)

Seoul, South Korea | Jun 2026 – Present

- Build features for an AI-powered web platform where teams design and edit app wireframes together in real time, shipping 30+ improvements across the user-facing product, admin tools, and server (TypeScript, React, NestJS)
- Redesigned how shared project links work so outside viewers see the same live canvas as editors — updates and comments now appear instantly — while removing a large amount of duplicated code
- Built the system that protects the platform from overload: it automatically slows excessive requests, enforces fair usage limits per team, and keeps working even when parts of the infrastructure fail; hardened through nine rounds of code review
- Strengthened product reliability with automated browser tests, monitoring of common failure points, and a clear maintenance screen shown to users during downtime

AI Project Developer — Alpaco Campus (AI intensive program)

Seoul, South Korea | Aug 2025 – Dec 2025

- Completed an intensive, project-based AI engineering program; designed and built two AI products end to end — **EduScope** and **Eat Smart!** (detailed under Projects below)

Full-Stack Developer Trainee — Korea Software Technology Association

Seoul, South Korea | Feb 2025 – Jul 2025

- Delivered features across the frontend, backend, and database of three team-built web applications — REST APIs with authentication, content creation, and search — along with relational data modeling and multi-user business logic

Military Researcher, Sergeant — ROK Army Logistics Command

Daejeon, South Korea | Jun 2023 – Dec 2024

- Contributed to AI and data-analysis tools that improved army logistics resource allocation and planning
- Built text-analysis workflows that categorized and summarized civilian complaints, giving leadership clear visibility into recurring issues and priorities

Research Assistant — Isik Lab, Johns Hopkins University

Baltimore, MD | Jan 2023 – Jun 2023

- Preprocessed and analyzed EEG and intracranial neural recordings for studies of human cognition and social perception in the Computational Cognitive Neuroscience Lab of Dr. Leyla Isik
- Collaborated with graduate students on shared data pipelines and lab documentation

PROJECTS

- **EduScope — classroom engagement analytics (computer vision, YOLO):** detects phone use, gaze direction, and hand-raising in live classroom video, producing per-session engagement analytics for instructors — [portfolio](#)
- **Eat Smart! — recipe recommendation (LLM + Neo4j graph RAG):** grounds LLM recipe recommendations in a knowledge graph; integrated a React frontend, Node.js/Express backend, and Flask model server — [slides](#)
- **Emerlet — map-based public restroom finder (Java, JSP, Oracle DB):** built the Google Maps integration, public-data migration into Oracle DB, location markers and detail views, and the user review system — github.com/leo09222022/SHINE

HONORS, ACTIVITIES & LANGUAGES

- **Honors:** Valedictorian, Asia Pacific International School; 1st Place, Korea Business Competition (2019)
- **Activities:** Tutor, JHU First Generation Investors; Marketing Team, JHU KROSS (Korean-Christian ministry); JHU Wind Ensemble
- **Languages:** English (native), Korean (native), Mandarin Chinese (intermediate, HSK Level 5)
